Chellomedia Moves National Geographic to OmniBus Colossus

Extra Channels Installed In Continuing Playout Expansion

DENVER, CO June 6th 2008 — OmniBus Systems, the award-winning provider of comprehensive broadcast automation and content management solutions, today announced that Chellomedia's Netherlands-based broadcast facilities provider, Digital Media Centre (DMC), has expanded its OmniBus Colossus installation with another eight channels, ready for the imminent transfer of its National Geographic TV playout operations.

Chellomedia provides European playout for National Geographic TV in Benelux, Scandinavia, Romania, Poland, and central Europe. This latest installation of eight new standard-definition Colossus channels brings to 18 the number of channels installed since the launch of Chellomedia's new server-based playout platform two years ago. Chellomedia also broadcasts two HD National Geographic channels and provides playout for The History Channel, Universal, and MGM on the Colossus platform.

More...

“This block of new channels is part of our planned programme of expansion for the new platform,” said Jon Try, Chellomedia’s Vice President of Broadcast Operations and Engineering. “We are continuously upgrading the operation to offer our customers the best and most innovative services, and OmniBus has been instrumental in this expansion by providing us with the versatile and scalable technology we need.”

Chellomedia’s Colossus installation is integrated with equipment from Omneon, Miranda, and Screen Subtitling.
